Ecological Swimming Pools © 2009

Bacta-Pur®, BACTIVATOR® & ECOPROBIOTICS® are trademarks of Aquaresearch Canada Ltd used under license.

ECOPROBIOTICS®, of the Bacta-Pur® System, are beneficial communities of natural bacteria, which have been on earth for millions of years and have been selected for their synergistic ability to biodegrade pollutants and to improve water quality. ECOPROBIOTICS® increase biodiversity. Just as people take probiotic yogurt for its' ability to assure the presence of the optimal community for digestion and immunity, ECOPROBIOTICS® improve ecosystem health. EVERY PRODUCTION of Bacta-Pur® products is analyzed and cleared for shipment ONLY after passing all performance tests and being CERTIFIED PATHOGEN FREE using techniques from the food industry. ECOPROBIOTICS® are purely natural and beneficial; they NEVER contain added chemicals such as surfactants, emulsifiers or enzymes..., nor do they contain genetically modified (GMO) or deliberately mutated organisms. ECOPROBIOTICS® are safe and beneficial. Disease causing organisms are never used, as others do or permit. All bacterial cultures in the Bacta-Pur® product are listed on the Canadian DSL.

A company in Allas-les-Mines in France builds ecological pools, which are integrated into the natural environment. The water treatment uses NO toxic chemicals, such as chlorine. The treatment is strictly natural, using plants and ECOPROBIOTICS®, from Bacta-Pur®. Bacta-Pur® KLEAR helps assure water clarity and quality for the pleasure of swimming in an ecological pool. Chemotherapy of Mother Nature has been replaced by a purely ecological system.
