## Certification

NATIONAL INDUSTRIALIZATION COMPANY (TASNEE) certifies that MODERN DISTRIBUTION ESTABLISHMENT, the exclusive agent of BACTA-PUR, CANADA for environmental solutions, has successfully installed a work station at our factory in Jubail, KSA. The work station was intended for our two bio-reactors, holding over **30,000 CUBIC METERS** of wastewater from our factory. The BACTA-PUR solution had successfully reduced the high levels of ammonia (NH<sub>3</sub>-N) by over 68% which is now acceptable by all means of our local municipality standards.

Yours faithfully,

  
Mutlaq Al Otaibi  
Manager, AA Operation
